

"THE UNIQUE TOUCH OF **CAST IRON**..."

## 01. About us

SYC Demir Döküm San. Ve Tic. A.Ş. With its different capacities as both a producer and a supplier, it has been able to respond to the demands of its clients since 1976. Our company, which has been functioning in Turkey's Eskişehir Organized Industrial Zone since 2012, was founded on a total area of 16.000 m<sup>2</sup>, of which 10.000 m<sup>2</sup> is a closed area.

Today, SYC, a reputable family business, continues to operate through numerous group companies and has established a solid reputation in the metal industry. While aiming to grow its family with skilled professionals, it continues to make day-to-day investments in the future.

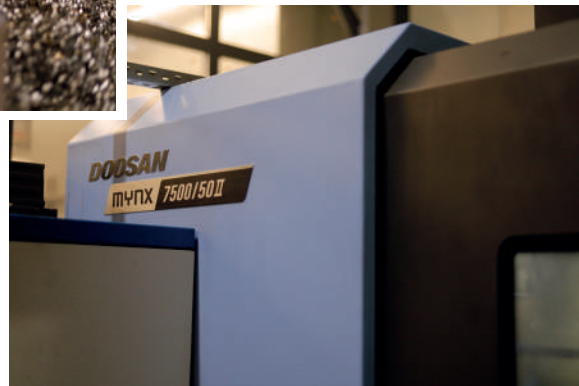

*“THE UNIQUE TOUCH OF **CAST IRON...**”*

# 02.Model Shop

[www.sycdokum.com](http://www.sycdokum.com)

Our factory is equipped with 3D modeling software such as Solidworks and can deliver high-level mold services to its clients.

# 03.Simulation

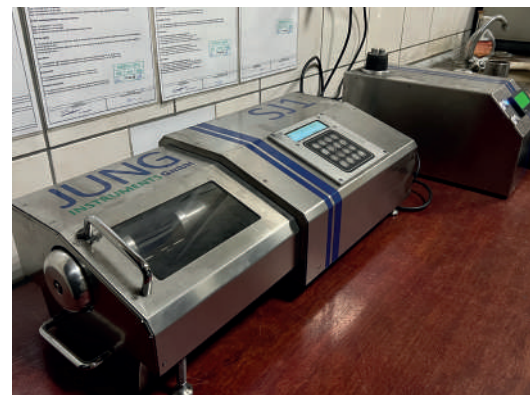

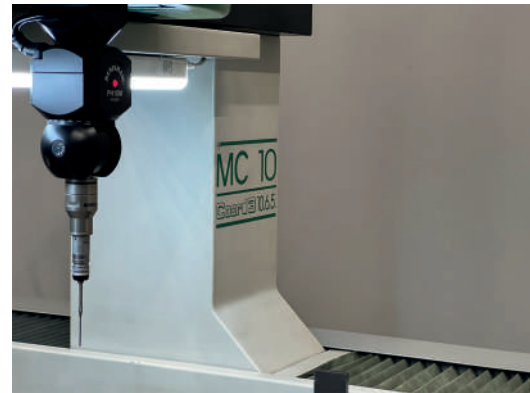

“

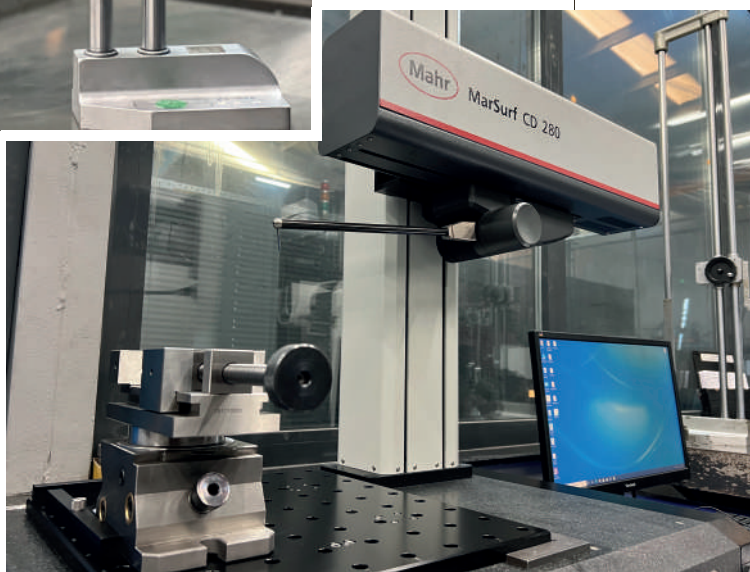

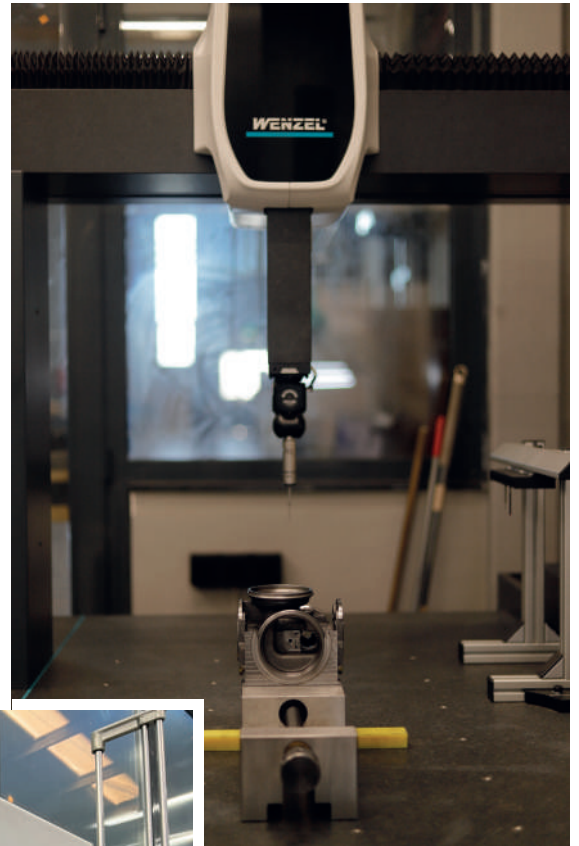

We use Magmasoft to model all of our parts, increasing casting efficiency.

# 04. Quality

[www.sycdokum.com](http://www.sycdokum.com)

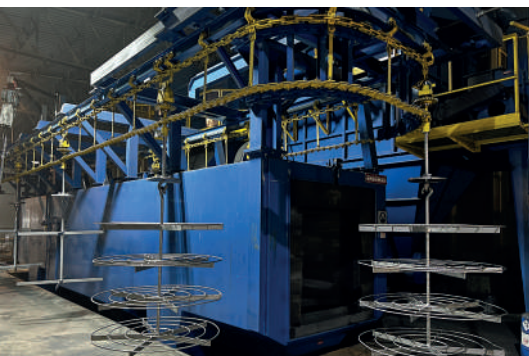

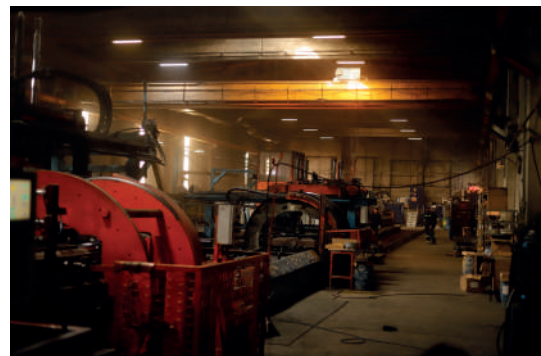

We carry out sand, metallurgical, metallographic, accurate dimensional measurement, and a wide range of controls and tests linked to coating quality in this expedition with the objective of quality production.

# 05. Foundry

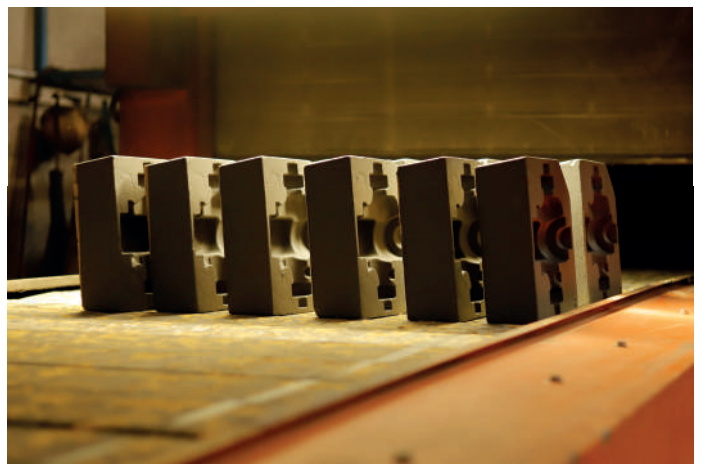

[www.sycdokum.com](http://www.sycdokum.com)

Our foundry features two 2.5 ton dual-track Eges induction furnaces and two 1.5 ton power-track Inductotherm induction furnaces; Disamatic has vertical molding, horizontal graded molding, and centrifugal casting technologies. After that, it uses grinding and continual cleaning machinery to prepare the pieces for transportation.

# 06. Core Shop

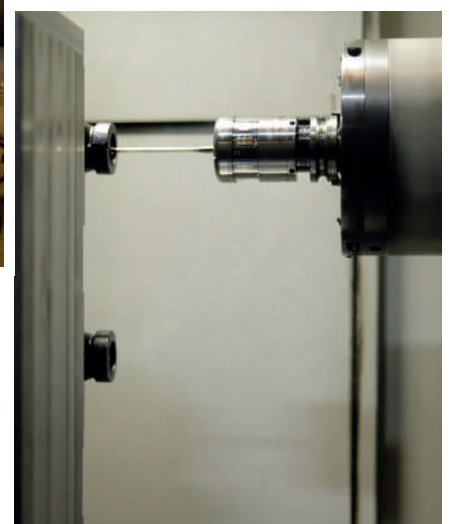

“

All types of coldbox and hotbox cores can be produced in our core shop, which has an automatic sand preparation system.

# 07. Machining

[www.sycdokum.com](http://www.sycdokum.com)

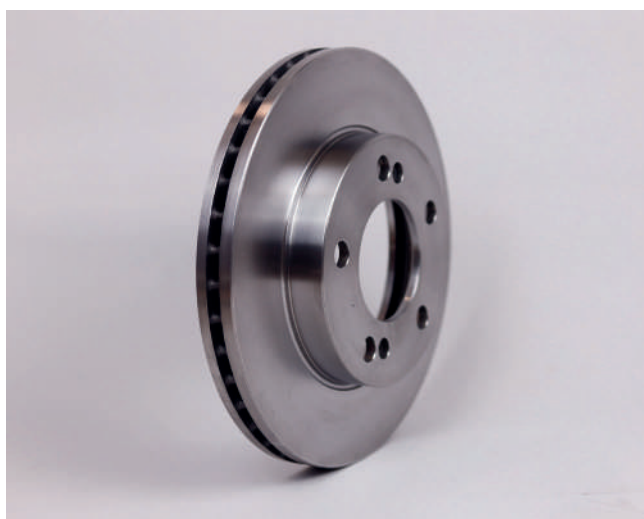

Our machining department, which contains various horizontal and vertical lathes, vertical machining centers, and horizontal machining centers with precise indexes, including C and Y axis, is where sensitive touches are created in the casting journey.
